PROFESSIONAL SUMMARY

Dedicated Full-Stack Developer and Computer Science Engineering student with expertise in the MERN stack and real-time communication architecture. Proven track record of building scalable web applications, custom CLI tools, and AI-driven solutions. Seeking a challenging Full-Stack Developer role.

ACADEMIC PROJECTS

Code Query | RAG-Powered Technical Chatbot | [Project Link](#)

Tech Stack: LangChain, Gemini 1.5 Flash, MongoDB Vector Search, Node.js, Express.js, Render

- Architected a Retrieval-Augmented Generation (RAG) chatbot using LangChain to ingest, vectorize, and query dense technical documentation and codebases.
- Implemented vector embeddings and semantic search storage natively within MongoDB, drastically reducing contextual hallucinations and improving prompt retrieval accuracy.
- Deployed a production-ready API layer on Render to handle user prompts, document parsing, and real-time streaming responses from the Gemini 1.5 Flash model.

Arbor | Custom Version Control System & CLI Tool | [Project Link](#)

Tech Stack: MERN Stack, AWS S3, Node.js, X Delta 3, SHA-256, Render

- Architected a Git-inspired version control system, engineering custom terminal commands including init, login, link, add, commit, push, and revert.
- Optimized cloud storage infrastructure using the X Delta 3 diffing algorithm to compact data and implemented SHA-256 hashing to accurately map file discrepancies.
- Managed secure remote backups utilizing AWS S3, deploying the live application to Render and packaging the backend as a publicly distributable NPM package.

Real-Time Video Conferencing Application | [Project Link](#)

Tech Stack: MERN Stack, WebRTC, Web Sockets, Render, bcrypt, JWT

- Engineered a responsive, Peer-to-Peer (P2P) video conferencing platform supporting multi-user rooms, screen sharing, and real-time chatting across devices.
- Implemented secure room access via unique meeting codes paired with token-based user authentication using bcrypt and JWT.

Property Renting Web Platform | [Project Link](#)

Tech Stack: Node.js, Express, EJS, MongoDB, Mapbox SDK, Cloudinary

- Built a server-side web application enabling users to list, browse, and rent properties via

dynamic HTML forms.

- Integrated the Mapbox SDK for forward geocoding to convert addresses into geographic coordinates, pinning locations on an interactive map.

Real-Time Lecture Scheduler & Conflict Resolution Platform

Tech Stack: MERN Stack (MongoDB, Express.js, React, Node.js), Socket.io, JWT

- Engineered a real-time full-stack scheduling ecosystem for academic institutions to manage dynamic faculty timetable swaps and unexpected cancellations.
- Integrated Socket.io to establish instant, bi-directional communication channels, pushing live schedule update and free-slot notification broadcasts to students and faculty.
- Designed a secure, request-based state management pipeline featuring a FIFO (First-In, First-Out) queue mechanism to programmatically prevent scheduling conflicts or dual-booking anomalies during open slot acquisitions.

EDUCATION

- **B.Tech in Computer Science and Engineering (5th Sem)** | VVP Engineering College (GTU) | Expected 2028
Current CPI: 7.27 (SPI: 7.70)
- **Class XII (GSEB)** | High School | 2024
Score: 50%
- **Class X (GSEB)** | High School | 2022
Score: 93 PR

SKILLS

- **Languages & Concepts:** C, C++, Java, Python, JavaScript, HTML, CSS | Data Structures & Algorithms, OOP, DBMS, System Design, Networking
- **Frontend & Mobile:** React.js, React Native (Expo), EJS, Tailwind CSS, Bootstrap, Material UI, Next.js
- **Backend & Databases:** Node.js, Express.js, WebRTC, Web Sockets, REST APIs | MongoDB, Mongoose, SQL, Redis, RabbitMQ
- **Cloud, DevOps & Tools:** AWS (EC2, S3), Docker, Kubernetes, CI/CD, Git, GitHub, Render, Cloudinary, bcrypt, JWT
- **AI & APIs:** TensorFlow.js, Gemini 2.5 Flash API, Hugging Face, Mapbox SDK

CONTRIBUTIONS & ACHIEVEMENTS

- **Lead Developer | Hackathon Team, IIT Gandhinagar (Feb 2026):** Independently managed 99% of full-stack development and deployment under strict time constraints to deliver a functional AI application.
- **Certifications & Training:** FullStack Developer Certificate from Apna College;

Completed Cybersecurity workshops at VVP Engineering College.

- **Continuous Learning:** Attended an exclusive Artificial Intelligence seminar at IIT Gandhinagar to study modern Large Language Models (LLMs).

PERSONAL PROFILE

Languages: English, Hindi, Gujarati | **Gender:** Male | **Address:** Shreeji Residency Block NO 21, Railnagar, Rajkot-360001, Gujarat, India
